Geometry: Axial strain cylinder in weather sealed case, with raised end load bearing faces. For use in compression.

The F216 is ideally suited to engineering force measurements. It is designed for easy installation, usually between two flat faces bearing on its loading rings. The small size of this loadcell makes it an ideal force sensor for mounting in existing machinery. It has been used in presses and printing machines. We are happy to design variants of this loadcell to meet your specific requirements. Versions can be manufactured for fully compensated operation up to +250°C. Please consult our engineering department.

Order Codes

Code	Description
F216CFR0K0	Compression, IP65, unrationalised
F216CFR0KN	Compression, IP65, rationalised

Structural Stiffness - Nominal

Range (kN)	Stiffness (N/m)
5	2.4 x 10 ⁸
10	4.8 x 10 ⁸
20	9.6 x 10 ⁸
40	1.9 x 10 ⁹

Notes

- AL = Applied load.
- RL = Rated load.
- Temperature coefficients apply over the compensated range.
- The load must be applied directly through the central loading axis.

Connections

The loadcell is fitted with 2 metres of PVC insulated 4 core screened cable type 7-2-4C.

Excitation + = Red, Excitation - = Blue, Signal + = Yellow, Signal - = Green, Screen = Orange.

The screen is not connected to the loadcell body.
