This high precision web tension loadcell is designed and built to meet the needs of machine designers, installation fitters and end users by the incorporation of alignment features with maximum flexibility.

The high performance of this loadcell is not compromised by the relatively large errors that can be produced by imprecise installation. We are happy to design variants of this loadcell to meet your specific requirements.

Order Codes

Code	Description
F325CF00H0	Compression, unrationalised

Structural Stiffness - Nominal

Range (kN)	Stiffness (N/m)
50	8.3 x 10 ⁵
100	1.1 x 10 ⁶
